

Kinesis Form Split Touchpad Keyboard

The all-new Form Split Touchpad Keyboard features a fixed split design with an integrated Windows Precision Touchpad making it the ultimate all-in-one ergonomic keyboard for the home, office, or the road.

Product Code

KB100-W

The Split is the difference

The fixed split design is expertly engineered to position the arms at shoulder width, promoting a natural alignment of the wrists that remains straight and perpendicular to the home row. This helps to minimise strain and reduce the need for excessive reaching.

Positioned in the space between the keys is a integrated Windows Precision Touchpad. The touchpad being centrally located means either hand can be used for cursor control, eliminating the need to reach to the side for a mouse.

Type, Point, Click and Scroll

The integrated Windows Precision Touchpad makes it quick and easy to point, click, and scroll on just about any operating system that recognises mouse input, all without leaving the keyboard or connecting a separate pointing device.

**Note: The keyboard features tap-to-click. There is no physical click or haptic feedback.*

Ambidextrous

The centrally positioned Touchpad allows both hands to access cursor control equally, facilitating balanced usage throughout the day.

Dual connections

The Form can function as a wired keyboard using the included cable, which also serves to charge the device. Additionally, it is equipped with a rechargeable battery and supports Bluetooth connectivity.

The Form can maintain simultaneous Bluetooth connections with two devices, allowing for seamless switching between them.

Strong and Durable

The case is crafted from 100% precision-machined aluminum with a dark gray finish. The keycaps are concave in shape, paired with low-profile mechanical switches that offer a mid-range activation force, ensuring a comfortable and precise typing experience.

Compatibility

Keyboard and Mouse Functionality: Windows, macOS, Linux, Chrome, Android TV, Tizen OS, Amazon Fire OS

Advanced Multi-Touch Gestures: Windows 10 & 11 Only
